DETAILS..

Email	xyz@b.com
Password	abcdef
Text	Hii. Good afternoon !!
Favourite web Framework	NodeJs
Country	US

2. Link the CSS styles sheet in html sheet for the above question

The CSS sheet is linked with HTML sheet using

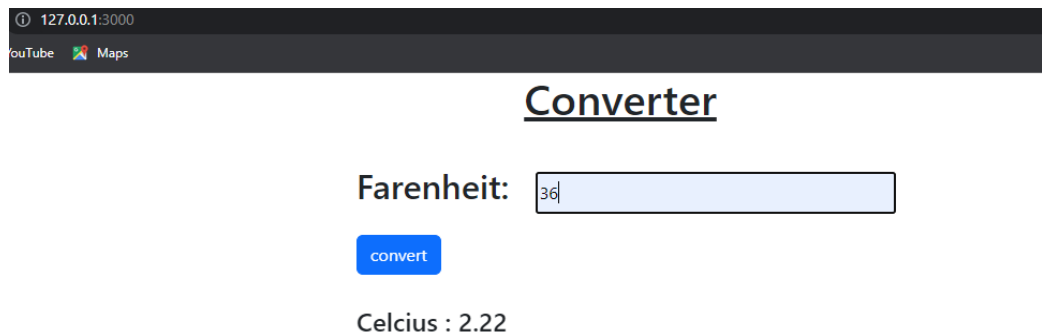

```
<link rel="stylesheet" href="styles.css">
```

3. Simple Farenheit to Celsius converter using Python Flask

The screenshot shows a web browser window with the address bar displaying "127.0.0.1:3000". The page has a dark header bar with "YouTube" and "Maps" icons. The main content area has a title "Converter" centered. Below the title, there is a label "Farenheit:" followed by a text input field containing the word "Farenheit". Below the input field is a blue button labeled "convert".

Output:

The screenshot shows the same web browser window as before, but now the input field contains the number "36". Below the input field, the blue "convert" button is still present. Below the button, the text "Celcius : 2.22" is displayed.
